Developer

# THE PROJECT

Develop a Dashboard with the help of AI and Data Intelligence that has the ability to track profession and certifications within the industry, alongside the experience and skills of the employees in order to find a successful strategy to track/follow on Employee Certifications.

# SOFTWARE & SOLUTIONS

Create a dashboard that can track and validate employee certifications, soft & hard skills, and the experience set in either projects or courses, with the help of IA, Data Mining and Data Intelligence.

## OBJECTIVES

- By the end of the semester, create a dashboard that can show each employee's certification and skills in order to facilitate the process of tracking
- Create an interactive platform by the end of the course to improve and reduce the process of hiring/promoting in order to help IBM

# SYSTEM SCOPE & LIMITATIONS

## SCOPE AND LIMITATIONS

Create and deliver a dashboard that helps to understand and manage information related to IBM's employees certifications, soft & hard skills, and experience set in projects and/or courses.

The dashboard will have different sections to display information related to the employees, their certifications, soft & hard skills, and experience in projects and/or courses. The dashboard will be a interactive plataform that provides access to such information, and it will help to improve the process of tracking employee's certifications.

This project is limited to the creation and development of said dashoboard and it will not extand to any other processes or problems not strictly related to what has been mention above.
